 TUB-4: pakirano v kartonski škatlici: 6x kovinski del D1, 6x kovinski del tubular, vijaki in vložki.

Uporaba:

Konzola TUB se uporablja za TUBULARNE radiatorje. Kovinski del D1 pritrdimo na steno, nanj montiramo kovinski del tubular. Ta del se vstavi med cevi radiatorja. Spodaj se lahko doda plastični distančnik, ki ohrani primerno distanco do stene ali kovinski del, enako kot zgoraj. To je odvisno predvsem od višine in dolžine radiatorja.

UK Packed /set:

TUB-1 - 2 metal parts D1, 2 tubular metal parts, 2 plastic spacers, screws and plugs (packed in a small cardboard box). TUB-2 - 3 metal parts D1, 3 tubular metal parts, screws and plugs (packed in a small cardboard box). TUB-3 - 4 metal parts D1, 4 tubular metal parts, screws and plugs (packed in a small cardboard box). TUB-4 - 6 metal parts D1, 4 tubular metal parts, screws and plugs (packed in a small cardboard box).

Usage:

Bracket TUB is designed for tubular - column radiators. The metal part D1 is fixed to the wall and the metal part of the tubular radiator is fitted on it. This part is inserted between the tubes of the radiator. The plastic spacer can replace the metal part at the bottom of the radiator. This depends on the height and the length of the radiator.
